Secondary School Examination
March 2019
Marking Scheme – SCIENCE (SUBJECT CODE 086)
(PAPER CODE – 31/2/1)

General Instructions: -

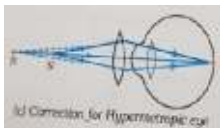

1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully. **Evaluation is a 10-12 days mission for all of us. Hence, it is necessary that you put in your best efforts in this process.**
2. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. **However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and marks be awarded to them.**
3. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
4. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled.
5. If a question does not have any parts, marks must be awarded in the left hand margin and encircled.
6. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
7. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
8. A full scale of marks 1 to 80 has to be used. Please do not hesitate to award full marks if the answer deserves it.
9. Every examiner has to necessarily do evaluation work for full working hours i.e. 8 hours every day and evaluate 25 answer books per day.
10. Ensure that you do not make the following common types of errors committed by the Examiner in the past:-
 - Leaving answer or part thereof unassessed in an answer book.
 - Giving more marks for an answer than assigned to it.
 - Wrong transfer of marks from the inside pages of the answer book to the title page.
 - Wrong question wise totaling on the title page.
 - Wrong totaling of marks of the two columns on the title page.
 - Wrong grand total.
 - Marks in words and figures not tallying.
 - Wrong transfer of marks from the answer book to online award list.
 - Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
 - Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
11. While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as (X) and awarded zero (0) Marks.
12. Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
13. The Examiners should acquaint themselves with the guidelines given in the Guidelines for spot Evaluation before starting the actual evaluation.
14. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
15. The Board permits candidates to obtain photocopy of the Answer Book on request in an RTI application and also separately as a part of the re-evaluation process on payment of the processing charges.

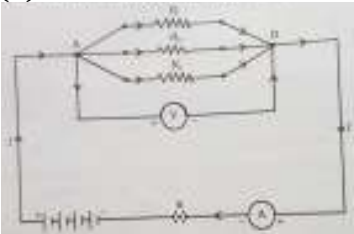

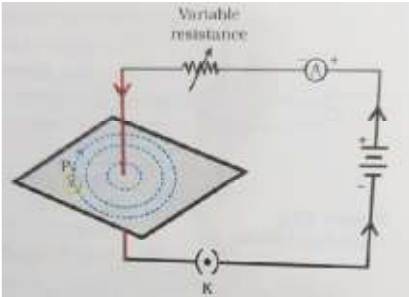

SET 31 / 2 / 1

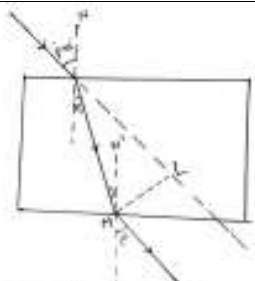

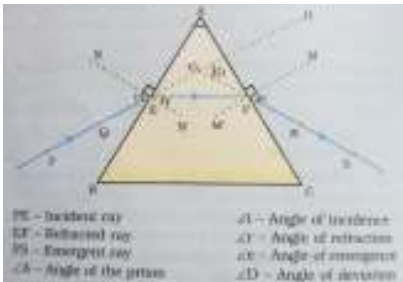

Q.No	Value Point/Expected Answer	Value	Total Marks
SECTION A			
A 1	Timber / Bidi / Paper / Medicine (any Two)	½ + ½	1
A 2	Due to high resistivity of alloys rather than its constituting metals.	1	1
A 3	SECTION B Molecular formula - C ₂ H ₄ . 	1	2
		1	
A 4	(a) Lustre, ductile, malleable, least reactive (any two) (b) Na & K are highly reactive (in air & moisture) OR Silver		

	<p>and on the addition of acid to the water the excess heat is absorbed by water.</p> <p>(b) Because HCl does not form H^+/H_3O^+ ions in dry condition.</p> <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> When electricity is passed through an aqueous solution of sodium chloride (brine) Chlor – alkali process X - Cl_2 Y = $CaOCl_2$ $2NaCl_{(aq)} + 2H_2O_{(l)} \rightarrow 2NaOH_{(aq)} + Cl_{2(g)} + H_{2(g)}$ $Ca(OH)_2 + Cl_2 \rightarrow CaOCl_2 + H_2O$ 	<p>1</p> <p>1</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p>	3																
A 8	<ul style="list-style-type: none"> Metal oxides showing both acidic and basic nature Example: Al_2O_3 / ZnO (or any other) $Al_2O_3 + 6HCl \rightarrow 2AlCl_3 + 3H_2O$ $Al_2O_3 + 2NaOH \rightarrow 2NaAlO_2 + H_2O$ <p style="text-align: center;">(Or any other example of equations)</p>	<p>$\frac{1}{2}$</p> <p>$\frac{1}{2}$</p> <p>1</p> <p>1</p>	3																
A 9	<ul style="list-style-type: none"> A series of compounds in which the same functional group substitutes for hydrogen in a carbon chain is called a homologous series. Example – Alkane / Alkene / Alkyne / Alcohol or any other one correct example. Characteristics:- <ul style="list-style-type: none"> (i) They have same general formula (ii) They have same functional group (iii) The difference in the molecular mass of two successive member in $14u$ (iv) The difference in the molecular formula of two successive member is of CH_2 unit. (v) They have similar chemical properties. <p style="text-align: right;">(Any three points)</p>	<p>1</p> <p>$\frac{1}{2}$</p> <p>$\frac{1}{2} \times 3$</p>	3
