27	Write down the process for transferring data on the internet	5
Ans	 The process for transferring data on the internet is as follows: The data is broken up into bits of same sized pieces called packets. A header is added to each packet. Each packet is sent from computer to computer until it finds its destination. 	
	 At the destination, the packets are examined. If any packets are missing or damaged, a message is sent asking for them to be re-sent. The packets are now reassembled into their original form. 5 marks for the given points or any relevant answer regarding 	
	the above points.

28		Write short notes on the following	5
	a	Web server	1
	Ans	A Web server is a computer that stores websites and their related files for viewing on the Internet. 1 mark for the correct answer or any other relevant answer.	
	b	Dial-up	2
	Ans	Dial-up internet access is a form of internet access that uses the facilities of the public switched telephone network/Direct Subscriber Line (PSTN/DSL) to establish a connection to an internet service provider (ISP) via telephone lines using a device called MODEM. Users dial a particular number provided by the ISP and gain access to the internet. 2 marks for the correct answer or any other relevant answer.	
	С	Wi-Fi	2
	Ans	Wi-Fi means wireless communication or wireless technology. 1 mark for any of the above correct answer.	
		OR	
		It is a popular wireless technology that allows an electronic device such as computers or mobile phones to exchange data wirelessly over a network, including high-speed internet connections. 2 marks for the correct answer or any other relevant answer. OR	
		Wi-Fi enabled devices such as Laptops, personal computer, smartphones,	
		video game console, etc. can connect to a network resource.	
		1 mark for the correct Example	
29		Explain the different types of charts.	5
Ans		Bar charts: A bar chart (horizontal bars) emphasizes the comparison between items at a fixed period of time. This chart type also includes cylinder, cone, and pyramid subtypes. Excuses for being late to class Indicated the introduction was stated as a fixed period of time. This chart type also includes cylinder, cone, and pyramid subtypes. Column charts: A column chart, unlike a bar chart to which it is often compared, emphasizes variation over a period of time. this chart type also

	Draw Table options to create the table.	
	i) Using Title and Content Option	
	ii) Click on Layout option available under Slides group in the Home tab.	
	iii) Click on Title and Content option from the dropdown list. Now click the icon available within the layout.iv) A dialog appears; enter the values for the required number of columns and rows.	
	OR Table Created with correct SQL Statement should be considered OR	
	Table Creation through datasheet view with proper steps should also be considered	
	5 marks for any of the above correct explanation.	_
31	What is database server? Explain primary key and foreign key.	5
Ans	Database servers are dedicated computers that hold the actual databases and run only the DBMS and related software. Database servers are also referred to as Back-ends. 1 mark for correct definition of database server.	
	A primary key is a unique field/column that identifies a row in a table.	
	2 marks for correct explanation of primary key.	
	A foreign key identifies a column or set of columns in one (referencing) table that refers to a column or set of columns in another (referenced) table.	
	OR	
	a column or set of columns, the value of which is derived from primary key of some other tables	
	OR	
	A column for its content depends on the unique or primary key of another table	
	OR	
	A unique field of one table act as a foreign key of another table. 2 marks for correct explanation of foreign key.	
	Note: Any relevant example illustrating the primary key and foreign key to be given due credit.
